

## Appendix 1

### ➤ User Manual

The program is very simple to use: after double clicking on the program icon, the main form will appear. From there, you will be able to create, update and delete students, subjects, classes and grades. In order to print, click on the printing commands and fill in the fields needed; a page will open on the browser and you can right click on the page, select print and print using your own printer.

Please make sure that you do not change the location or the file and folder hierarchy of the program files. If you do, there is a big possibility that the program will malfunction. If there is a need to download Eclipse, please use the following link:

[http://www.eclipse.org/downloads/download.php?file=/technology/epp/downloads/release/kepler/SR2/eclipse-standard-kepler-SR2-win32-x86\\_64.zip](http://www.eclipse.org/downloads/download.php?file=/technology/epp/downloads/release/kepler/SR2/eclipse-standard-kepler-SR2-win32-x86_64.zip)

or download it from eclipse.org.

Thank you for using our application.
